What to Expect

Step 1

A Q-tip-like swab will be inserted into your nose, similar to a flu test. It takes about 15 seconds and you may stop at any time.

The test is the Nasopharyngeal (NP) COVID-19 test and has a 70-80% sensitivity.

Step 2

Your sample is then sent to the lab for processing.

Step 3

You can expect your test results generally within 2-4 days. Someone will call you if you test positive or you can find your results online at KnowNow: https://webapps2.uc.edu/know/ Access info given to you during registration.

If you were tested because of symptoms of COVID-19 or may have been in contact with someone who is a confirmed case:

- Stay home for 14 days after your last contact with the person.
- Watch for fever (100.4F) and COVID symptoms.
- If possible, stay away from others.
